

## CONTENTS

### About this 2009 Work Programme

#### Work programme fact sheets

- 1.1. Partnerships and network coordination (N° 1 to 3)
  1. AFSSET network within France
  2. AFSSET: European and international network
  3. Inter-institutes programme on the governance of activities and situations posing a risk to humans and to the environment
  
- 1.2. Expertise and health risk assessment in response to solicited requests (N° 4 to 28)
  4. Nanomaterials
    - Exposure scenarios to nanomaterials in consumer products
    - Carbon nanotubes
  5. Radiofrequencies
  6. Extremely low frequencies
  7. Light emitting diodes and macular degeneration
  8. Impacts on health of 2nd generation biofuels
  9. Assessment of health risks for the general and occupational populations linked to mycotoxins and allergens arising from microfungus in individual and collective buildings
  10. Assessment of health risks linked to the use of water produced by urban wastewater treatment for watering green spaces
  11. Assessment of health risks linked to the reuse of greywater at home and of collected rainwater for washing laundry
  12. Assessment of risks linked to the proliferation of *Ostreopsis ovata* algae in bathing waters
  13. Assessment of health risks linked to swimming pools
  14. Determination of limit values for microbiological parameters in discharges of wastewater treatment systems (collective et non collective)
  15. Risk assessment for environmental/occupational exposure to ethanol
  16. Health risk assessment for emissions of particles and nitrogen dioxide from Diesel vehicles
  17. Simplified risk assessment for the use of anti-mosquito spiral coils
  18. Volatile organic compounds (VOC)
  19. Vector control
  20. Indoor air quality guideline values
  21. Formaldehyde
  22. Human health toxicity values
  23. Glycol ethers: PGME/A (propylene glycol monomethyl ether / acetate)
  24. Short and fine asbestos fibres
  25. Naturally occurring asbestos
  26. Study of the substitution of category 1 and 2 CMR chemical agents
  27. Risks linked to the manufacturing and machining of carbon composites
  28. Professional activities and air quality in covered parking lots
  
- 1.3. Permanent missions of risk assessment and scientific and technical support to the public authorities (N° 29 to 51)
  29. Nanomaterials
    - Support to Ministry of Health for meetings of the OECD on nanomaterials
    - Database on nanomaterials
    - ISO – Technical Committee (TC 229) – Definition of hazard limits for manufactured nanomaterials
    - Nanomaterials and OECD : sponsorship of titanium oxide and silicon dioxide
  30. Low energy consumption light bulbs
  31. Evaluation of the *polymerase chain reaction* (PCR) technique for the detection of *Legionella*
  32. Coordination of public establishments participating in the epidemiological study “Impact of the fallout from plumes emitted by electricity-producing power plants on the incidence of legionellosis cases”
  33. Opinions on requests for authorization of substances and processes for treatment of swimming pools waters

34. Preparation of a reference document to assist in the instruction of files requesting authorization of products and processes meant for treatment of swimming pools waters
  35. Systems for collective waste water treatment: requests for individual opinions
  36. Expert appraisal in view of elaborating occupational exposure limit values for chemical agents
  37. Effectiveness of personal protective equipment in occupational settings
  38. Approval of embalming products and funerary materials
  39. National network for monitoring and prevention of occupational diseases
  40. Data surveillance coordinating body on pesticide residues
  41. Chlordecone plan
  42. Instruction and comitology of the biocides active substances files
  43. Biocides: support to the competent authorities
  44. Biocides data base (AXONET)
  45. Rodenticides and biocidal sanitation products
  46. Instruction of biocides products files (post-registration)
  47. Simplified risk assessment linked to the implementation of anti-termite barriers
  48. Implementation of the protocol on the organisation of the expertise for « REACH » – permanent mission
  49. REACH - Biomonitoring programme for Decabromodiphenyl ether (DecaBDE)
  50. REACH - Socio-economic analysis of risk management measures
  51. Support for the implementation of the French National Environment and Health Plan
- 1.4. Coordination and support of the applied research programme (N° 52 to 54)
    52. Coordination of environmental health research programmes ERA-ENVHEALTH project
    53. Coordination of occupational health research programmes in Europe NEW OSH ERA project
    54. Programme of support to environmental and occupational health research
  - 1.5. Scientific and technical monitoring, methodology (N° 55 to 62)
    55. Watch on the dangers linked to the water cycle
    56. Exploitation of PBPK (physiologically based pharmacokinetic) models
    57. Identification of chemical substances of health importance: emerging pollutants
    58. INTARESE (Integrated assessment of health risks of environmental stressors in Europe) project
    59. Scientific monitoring bulletin
    60. Creation of a general database of exposure factors needed for conducting risk assessments
    61. Monitoring and analysis of methodologies available for risk assessment, Bibliographic watch, Watch system, Archiving, Training for staff
    62. Computerized observatory for sociological watch
  - 1.6. Information, communication, public debate (N° 63 to 73)
    63. Non-ionising radiations
    64. Production of scientific information documents for various sections of the public
    65. Develop environmental health training and expand the network of partners
    66. Sociological analysis of alerts and of public debate
    67. Mobilisation of human and social sciences in support of measures for expertise and governance of risks
    68. Cycle of meetings and debates open to the public
    69. E-Communication: AFSSET internet and intranet sites
    70. E-Communication: portals with multiple partners
    71. Information: Implementation of the stipulations concerning access rights to environmental information
    72. Publishing – editorial secretariat in support of the agency's scientists
    73. Activities of the « Press and Events » Unit
